LUXORA TECHNICAL CODEBASE GUIDE

Architecture, Components Hierarchy, Indian Rupee Payment Gateway & Framer Motion Engine

1. Architectural Stack

- Framework: React 19 SPA running on Vite 8 (TypeScript ES2022).
- Styling: Tailwind CSS v4 with custom Cinzel / Plus Jakarta typography.
- Animation: Framer Motion v12 scroll-triggered reveal with [0.16, 1, 0.3, 1] cubic-bezier easing.
- Icons: Lucide React icon library.
- Persistence: LocalStorage synchronized state (Cart items, Wishlist array, Order history).

2. Modular Component Hierarchy

- src/App.tsx: Central application state orchestrator & drawer controller.
- src/components/Navbar.tsx: Top Bar Contract adhering to single-line navigation & action zones.
- src/components/Hero.tsx: Showcase stage with interactive angle toggles & live balance oscillation.
- src/components/ProductGallery.tsx: 3-column catalog grid with search, filter tabs, and Framer Motion stagger.
- src/components/ShowcaseGallery.tsx: Curator spotlight carousel with AnimatePresence transitions.
- src/components/ProductDetailModal.tsx: Zoomable visual sheet, strap customizer & engraving.
- src/components/CartDrawer.tsx: Slide-over bag with subtotal, duties, and complimentary shipping.
- src/components/WishlistDrawer.tsx: Saved watches manager with localStorage persistence.
- src/components/CheckoutModal.tsx: 3-step checkout with UPI, RuPay, RTGS Escrow & digital certificate.
- src/components/OrderLookupModal.tsx: Live tracking and on-chain authenticity verification.
- src/components/CraftsmanshipSection.tsx: Manufacture Calibre 3129 bench notes & microscopic detail.

3. Currency & Indian Payment Protocols

- Currency Formatter: src/utils/format.ts with Intl.NumberFormat('en-IN', { style: 'currency', currency: 'INR' }).
- UPI Instant Gateway: VPA support (Google Pay, PhonePe, Paytm, BHIM) with zero merchant surcharge.
- Card Gateway: RuPay, Visa, Mastercard, and American Express with 3D Secure / OTP validation.
- RTGS Escrow: Direct luxury escrow instructions via HDFC Bank Fort Mumbai Treasury.
- Web3 Crypto: Multi-sig smart escrow contract (USDC / BTC / ETH) with in-transit lock.

4. Production Asset Bundling Verification

- Images directly imported in src/data/watches.ts via ES Modules for Vite hash-bundling.
- Static public fallback copies in public/images/ guaranteeing 100% uptime on shared links.
- Proactive onError handlers on every <img> element preventing broken image states.
