SWISS HOROLOGICAL TRADITION

1. CÔTES DE GENÈVE & PERLAGE:

Each bridge undergoes circular graining with diamond paste and boxwood rods, yielding distinctive refractive waves.

2. HAND-CHAMFERED ANGLAGE:

Internal and external edges are manually cut to an exact 45-degree angle, mirror-polished with gentian wood pegs.

3. THERMAL FLAME-BLUED SCREWS:

Tempered over charcoal to exactly 290°C (554°F), creating a protective royal blue oxide patina.

4. FREE-SPRUNG VARIABLE INERTIA BALANCE:

Eliminates traditional regulator pins for supreme isochronism and resistance against physical shocks.

5. 5-YEAR INTERNATIONAL CHRONOMETER WARRANTY:

Every timepiece is regulated to COSC/Geneva standards and escorted via armored courier with Lloyd's insurance.
